## IT5039 – Project
Task 1: UI Design
Jeshua Hertzke - 20210843
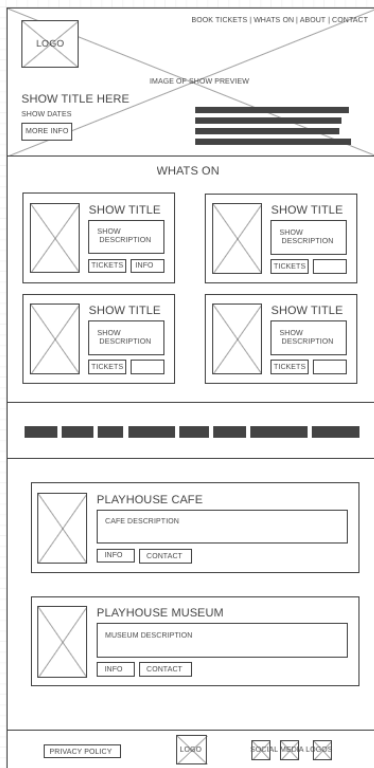

Step 1 - Sitemap:

Below is a sitemap of the proposed Playhouse Theatre to be designed. It will have the pages: Homepage, Book Tickets, What's On, About and a Contact page. The pages will be accessible in the main menu of the Homepage.

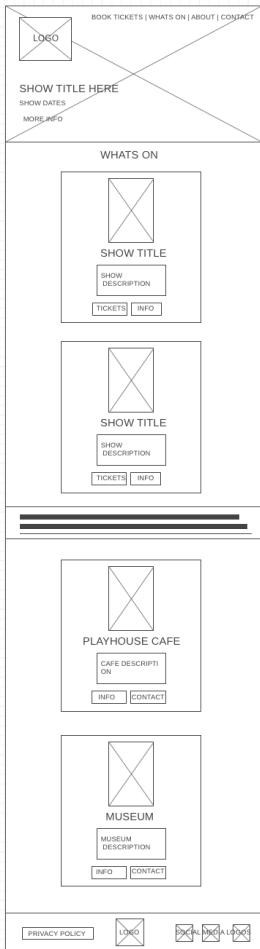

Step 2 - Wire Frames:

Below are wireframes for four pages of the website. These are the most important pages being the Homepage, Booking page, About page and the Contact page. Each page has a wireframe representing different device screen widths, up to 480px wide for the mobile device, 480px - 768px for the tablet device and 768px upwards for the desktop and large screen devices.

Step 3 - Produce Mock-ups:

Below is a mock-up of the Homepage. This is the core page as it shows the user what shows are showing at the Playhouse Theatre and when they are showing. It then allows the user to make a booking. It also has a menu to easily navigate through the website. A mock-up of the Homepage will also allow you to see the overall design of the website. The website design will be simple with the main colours being black, white, and red so that the content focuses mainly on the show posters and show content. A square design style will be used consistently throughout the site including the square logo of the Playhouse Theatre. The top hero image will be a slideshow showing a preview image of the current shows at the theatre with information and a link to that show for more information.
